Towards a greener world

A close-up photograph of two hands, one from an adult and one from a child, gently cupping a small, translucent globe. The background is a soft-focus green, suggesting foliage. A semi-transparent white circle is overlaid on the hands, containing the 'Claps!' logo and the word 'catalogue' below it.

START WITH SOME FACTS

La metà di tutte le materie plastiche prodotte sono state realizzate negli ultimi 15 anni.

Le materie plastiche spesso contengono additivi che le rendono più forti, più flessibili e durevoli. Ma molti di questi additivi possono prolungare la vita dei prodotti se diventano rifiuti, con alcune stime che prevedono almeno 400 anni per la loro distruzione.

Half of all plastics ever manufactured have been made in the last 15 years. Plastics often contain additives making them stronger, more flexible, and durable. But many of these additives can extend the life of products if they become litter, with some estimates ranging to at least 400 years to break down.

CONTINUE WITH SOME NUMBERS

Ogni giorno 8 milioni di pezzi di plastica inquinano il nostro oceano.

Solo l'1% dei rifiuti marini galleggia, tutto il resto scompare nel fondo del mare.

La plastica è stata trovata fino a 11 km di profondità, contaminando i luoghi più remoti della Terra.

8 million pieces of plastic pollution find their way into our ocean daily.

Only 1% of marine litter floats, everything else sinks to the sea floor.

Plastic has been found as far as 11km deep, contaminating the most remote places on Earth.

OUR "GO GREEN" VISION

Abbiamo deciso di far parte dello sforzo ambientale e di dedicarci a un mondo più verde.

We have decided to be part of the environmental effort and to be dedicated to a greener world.
